Subject Index

A

Abscisic acid
  control of *rbcS* and *cab* transcription, tomato leaves, 291
  sucrose level relations, seed growth rate and, soybean, 1308
Abutilon theophrasti (*see* Velvetleaf)
Acacia senegal, gum arabic glycoprotein, twisted hairy rope, 848
Acer pseudoplatanus (*see* Sycamore)
Acer saccharum, water relations, hydraulic architecture and, 1105
Acetolactate synthase
  herbicide resistance, *Datura innoxia*, 255
  inhibiting herbicides, binding to regulatory site, tobacco and cotton, 310
Acetyl-coenzyme A synthetase, spinach leaf, purification and characterization, 382
Acyl carrier protein, conjugated to glutathione, spinach seed, 937
Adenosine monophosphate, rapid modulation, spinach leaf nitrate reductase, photosynthesis, 368
Adenosine triphosphatase, cytochemical localization, salinity, tomato roots, 153
Adenosine triphosphate, rapid modulation, spinach leaf nitrate reductase, photosynthesis, 368
S-Adenosylmethionine synthetase, cDNA from carnation, cloning and nucleotide sequence, 997
Aging, loss of basipetal IAA transport, biochemical bases, sunflower hypocotyls, 875
Agrobacterium rhizogenes, tobacco transformation with, auxin sensitivity and, 1131
Agrobacterium tumefaciens
  transformation, wall deficient tobacco protoplasts, 498
  -*Vitis* interaction, modulation of, 121
Alcohol dehydrogenase, isoenzymes, cellulase and polygalacturonase, avocado, 269
Alfalfa
  betaines, 892
  roots, bacteroids, and cytosol, salt stress effects, 1228
  taproots, carbohydrate metabolism, winter adaptation and spring regrowth, 786
Algae
  Bryopsis maxima, spontaneous generation of subprotoplasts, disintegrated *Bryopsis* cell, 819
  Dunaliella salina, pH regulation, Na^+/H^+ antiporter, 110
  green, immunocytochemical localization, nitrite reductase, 699
  Selenastrum minutum, dark ammonium assimilation, plastoquinone pool of photosystem II, 513
Alocasia macrorrhiza, leaf, 2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
Aluminum
  mechanism of tolerance, snapbeans, 737
  temperature alteration, cell membrane permeability, Northern red oak, 644
Amino acids
  salt stress effects, roots, bacteroids, and cytosol of alfalfa, 1228
  sequence, pathogenesis-related-1 related protein, corn, 1372
  transport, plasma membrane vesicles, beet leaves, 1338
1-Aminocyclopropane-1-carboxylic acid, transport and metabolism, sunflower seedlings, 1360
5-Aminolevulinic acid, induced photodynamic damage, photosynthetic electron transport chain, cucumber cotyledons, 761
δ-Aminolevulinic acid, conversion by enzymes to protoporphyrin IX, cucumber cotyledons, 910
Ammonium, assimilation, plastoquinone pool of photosystem II, *Selenastrum minutum*, 513
α-Amylases
  heterologous, wheat inhibitors, 768
  inhibitor, resistance to cowpea weevil, bean seed, 993
  production, *ent*-kaurene biosynthesis relations, germinating barley, 1099
β-Amylases, rye, regulatory aspects and processing, 84
Amyloplasts, distribution of protein kinase in, cultured cells of sycamore, 1142
Anthocyanin, production, cabbage, 1079
Antioxidants, cellular, photosynthesis, ozone in polar leaves, 650
Apple
  micropropagated plantlets, modulation of gene transcripts, cytokinins, 479
  xylem sap proteins, 597
Arabidopsis thaliana
  arabinose kinase-deficient mutant of, 1255
  differential expression, nitrate reductase genes, 275
  Fe-catalyzed photooxidation of EDTA, root growth, plant culture media, 843
  genes, homology to fungal and S-gene RNAses, 980
  leaf
    calmodulin isoforms in, 1196
    2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
    chloroplast number mutants in mesophyll cells of, 1193
  new *cab* gene from, chromosomal localization of, 1387
  PR-1-like protein, isolation and characterization of gene, 346
  systemic endopolyploidy, 985
Arabinose kinase, mutant deficient of, *Arabidopsis thaliana*, 1255
Arctotheca calendula, paraquat resistance, 314
Argon, -induced decline in nitrogenase activity, increases in oxygen concentration, soybean root nodules, 376
Ascorbate
  glutathione concentrations and, ambient oxygen and fixed nitrogen, soybean root nodules, 812
  plasma membrane vesicles loaded with, transmembrane electron transport, beet, 1178
Ascorbic acid oxidase, zucchini squash, 159
Aspartic acid, conjugation with auxins, indole-3-acetic, root formation in pea cuttings, 836
Atrazine, resistance in velvetleaf biotype, enhanced glutathione *S*-transferase activity, 104
Autotrophy, redox-modulation, chloroplast enzymes, 1
Auxin
  control of defense reactions and responsiveness to exogenous elicitors, tobacco and soybean protoplasts, 459
  -enhanced glucan autohydrolysis, maize coleoptile cell walls, 285
  indole-3-acetic acid and indole-3-butyric acid, adventitious root formation, pea cuttings, 836
  -induced cell elongation, maize coleoptiles, cell wall glucanases, 426
  -induced elongation, inhibition by xyloglucan antibodies, Azuki bean epicotyls, 551
  promotion of radial growth, *Ranunculus sceleratus* petioles, 806
  sensitivity, transformed tobacco flower buds, 1131
  transport, suspension-cultured soybean root cells, 184, 192
Avena sativa (*see* Oat)
Avocado, alcohol dehydrogenase isoenzymes, suppression, cellulase and polygalacturonase, 269
Azuki bean, epicotyls, inhibition by xyloglucan antibodies, auxin-induced elongation, 551

B

Bark, poplar, storage protein accumulation, photoperiod control, 686
Barley
  chymotrypsin inhibitor-2 gene of, nucleotide sequence, 1389
  gene encoding, complete nucleotide sequence of, 1382
  germinating, *ent*-kaurene biosynthesis and α-amylase production in, 1099
  heat shock, normal cellular protein mRNA levels during, 1048
  intact leaves, nitrate-dependent O_2 evolution, 898
  multiplicity of histone H3 variants, 453
  transpiration, methyl jasmonate and, 1376
Bean
  circadian rhythms in photosynthesis, 831
  immunocytochemical localization, glutamine synthetase in organs, 507
  leaf, 2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
  leaf water, modeled and observed environmental influences, oxygen and hydrogen isotope, 588

lipid peroxidation in peribacteroid membranes, 826
mechanism of aluminum tolerance, 737
seed, resistance to cowpea weevil, α-amylase inhibitor, 993
Beet
leaf
2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
plasma membrane vesicles, amino acid transport in, 1338
transplasma membrane electron transport, 1178
vacuoles or tonoplast vesicles, sucrose phosphate in, 1014
Betaines, alfalfa, 892
Beta vulgaris (*see* Beet)
Birdsfoot trefoil, legume nodule respiration, O_2 permeability, spectrophotometry of leghemoglobin, 137
Black cherry, mature seeds, mandelonitrile lyase in, 1329
Bleaching cycle, light-induced chloroplast differentiation, soybean cells, 962
Bowman-Birk soybean trypsin inhibitor, degradation, cysteine protease and, 1086
Bradyrhizobium japonicum, adaptation of nodulated soybean, growth in rhizospheres, nonambient pO_2, 728
Brassica campestris, cotyledonary explants, *de novo* shoot regeneration, ethylene, 178
Brassica napus, 20-kilodalton oleosin gene, genomic nucleotide sequence of, 1395
Brassica oleracea (*see* Cabbage)
Broad bean
colocalization of polyphenol oxidase, photosystem II proteins, 26
guard cell chloroplasts, modulation by blue light, chlorophyll *a* fluorescence, 753
Bryophytes, flavonoid evolution, enzymic approach, 680
Bryopsis maxima, disintegrated cell, spontaneous generation, subprotoplasts, 819

C

Cabbage, cryptochrome, phytochrome, and anthocyanin production, 1079
cab gene, *Arabidopsis thaliana*, chromosomal localization of, 1387
Caffeoyl-coenzyme A, -specific 3-*O*-methyltransferase, kinetic characterization, parsley cell suspensions, 327
Calcium
-dependent protein kinase, pea nuclei, 720
lack of competition by sodium, regulation of sodium influx, salinized maize roots, 331
leaf water potential, antitranspirant-induced increases, potato, 116
pump, solubilization and reconstitution, corn leaf plasma membrane membrane, 565
regulation, cytosolic fructose-1,6-bisphosphatase, spinach leaves, 1026
Callose synthase, developmental regulation in tomato, 664
Calmodulin isoforms, *Arabidopsis thaliana* leaf, 1196
Carbohydrates
metabolism in taproots, winter adaptation and spring regrowth, alfalfa, 786
metabolizing enzymes, light regulation of sink metabolism, tomato fruit, 922
salt stress effects, roots, bacteroids, and cytosol of alfalfa, 1228
Carbon
assimilation, circadian rhythms in photosynthesis, red kidney bean, 831
inorganic, cloning and inactivation, *Synechocystis*, 280
isotope distribution, natural glucose, 609
Carbon dioxide
downward regulation of photosynthesis and growth, sour orange, 990
-enhanced yield and foliar deformation, tomato genotypes, 713
gain and photosynthetic response, photosynthetic photon flux density cycles, chrysanthemum, 529
long-term elevation, quantum yield of photosynthesis, *Scirpus olney*, 221
photosynthetic and photorespiratory characteristics, *Flaveria* species, 518
rapid modulation, spinach leaf nitrate reductase, photosynthesis, 363
short-term effects, carnation callus cell respiration, 467
2-Carboxyarabinitol 1-phosphate, measurement in plant leaves, isotope dilution, 208
Carnation
callus cell respiration, short-term effects, carbon dioxide, 467
cloning and nucleotide sequence, *S*-adenosylmethionine synthetase cDNA, 997
flower senescence-related mRNA, ethylene biosynthesis, 1000
Carrot
cell wall glycoprotein, heterogeneity, cell type-specific localization, 705
inhibition of phosphatidylinositol monophosphate, neomycin, 340
Castor bean
leucoplast pyruvate kinase subunit relations, 1253
nucleotide sequence of complementary DNA clone, stearoyl-acyl carrier protein desaturase, 344
Catalase, activity line, corn, 1379
Catharanthus roseus, cells, polyamines and the cell cycle of, 1008
Cell membrane, permeability, aluminum and temperature alteration, Northern red oak, 644
Cellulase, polygalacturonase and, alcohol dehydrogenase isoenzymes, avocado, 269
Cell wall
deficient tobacco protoplasts, *Agrobacterium tumefaciens*, 498
glucanases, auxin-induced cell elongation, maize coleoptiles, 426
glycoprotein from carrot suspension cells, heterogeneity, cell type-specific localization, 705
gum arabic glycoprotein, twisted hairy rope, 848
loosening, xyloglucan antibodies, Azuki bean epicotyls, 551
maize coleoptile, auxin-enhanced glucan autohydrolysis, 285
Chalcone synthase, flavonoid evolution, enzymic approach, 680
Chlamydomonas reinhardtii, immunocytochemical localization, nitrite reductase, 699
Chlamydomonas reinhardtii y-1, thylakoid membranes in, 1321
Chlorella fusca, immunocytochemical localization, nitrite reductase, 699
Chlorophyll, chlorophyll-binding proteins and, cytoplasmic and nuclear mutations, soybean senescence, 227
Chlorophyll *a*, fluorescence, modulation by blue light, guard cell chloroplasts, 753
Chloroplasts
guard cell, modulation by blue light, chlorophyll *a* fluorescence, 753
inner envelope membranes, glycolate/glycerate transporter, spinach, 1060
light-induced differentiation, soybean cells, 962
number mutants in mesophyll cells, *Arabidopsis thaliana* leaf, 1193
pea, zeaxanthin formation, fluorescence quenching, 635
pea and wheat, nitrogen nutrition, partitioning, 355
spinach, biosynthesis, prokaryotic galactolipids, 144
structure and function, maize mitochondrial mutant, 232
Chloroplast enzyme
redox-modulation, 1
soluble, processing of preLHCP made in *E. coli*, 1220
Chrysanthemum, carbon gain and photosynthetic response, photosynthetic photon flux density cycles, 529
Chymotrypsin inhibitor-2 gene, barley, nucleotide sequence, 1389
Circadian rhythms
N_2-fixing, repression of *nif* gene, *Synechococcus*, 324
photosynthesis in red kidney bean, 831
Citrullus lanatus (*see* Colocynth; Melon, bitter)
Citrus aurantium (*see* Orange, sour)
Citrus exocortis viroid, infection, polyamines and, 1053
Cold, acclimation, sucrose synthase expression, wheat, 887
Coleoptiles
maize
auxin-induced cell elongation, cell wall glucanases, 426
cell walls, auxin-enhanced glucan autohydrolysis, 285
Colocynth, pyrophosphate dependent phosphofructokinase of, 1185
Commelina communis, guard cell chloroplasts, modulation by blue light, chlorophyll *a* fluorescence, 753
Conifers, defense mechanisms, 38, 44
Corn
catalase activity line, 1379
coleoptile cell walls, auxin-enhanced glucan autohydrolysis, 285
ferredoxin gene family, molecular cloning, differential expression, 77
in vivo regulatory phosphorylation site, C_4-leaf phospho*enol*pyruvate carboxylase, 297
isolation and characterization, dihydrodipicolinate synthase, 444
α-ketoglutarate carrier from, partial purification and reconstitution of, 1003
leaf, 2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
leaf plasma membrane, solubilization and reconstitution, Ca^{2+} pump, 565
mitochondrial mutant, chloroplast structure and function, 232

multiplicity of histone H3 variants, 453
pathogenesis-related-1 related protein, amino acid sequence in, 1372
root
growth at low water potentials, 1125
hydrotropism, interaction with gravitropism, 558
phosphohydrolase differentiation in, 1345
stelar anoxia in low oxygen concentrations, 1294
root microsomes, vanadate-sensitive proton pump from, temperature effects, 1114
root tip polyribosomes, protein synthesis, elongation and termination reactions, 418
root tips, glucose starvation, 619
salinized roots, sodium influx, 331
seedling root, ethylene evolution, mechanical impedance and, 1171
small heat shock protein gene from, 1268
sporophytic tissues, hydroxyproline-rich glycoproteins in cell walls, 1214
sucrose biosynthesis, sucrose phosphate synthase, 473
turgor and root growth, spatial distribution, low water potentials, 438
Cotton
acetolactate synthase inhibiting herbicides, binding to regulatory site, 310
seedling, root restriction, factor in photosynthetic acclimation, 627
Cotyledons
cucumber
conversion enzymes, δ-aminolevulinic acid to protoporphyrin IX, 910
protoporphyrin IX binding polypeptide, 432
explants of *Brassica campestris*, *de novo* shoot regeneration, ethylene, 178
Cowpea weevil, resistance of bean seed, α-amylase inhibitor, 993
C_3 plants, *Scirpus olney*, long-term CO_2 elevation, photosynthesis, 221
Crassulacean acid, metabolism, five species of Portulacaceae, 1118
Cryptochrome, production, cabbage, 1079
Cucumber
cotyledons
conversion enzymes, δ-aminolevulinic acid to protoporphyrin IX, 910
photosynthetic electron transport chain, damage by 5-aminolevulinic acid, 761
cotyledons treated with diphenyl ether-type herbicides, protoporphyrin IX, 63 kilodalton polypeptide, 432
roots, plasmalemma redox activity and hydrogen in, 1034
Cucumis melo (*see* Muskmelon)
Cucumis sativus (*see* Cucumber)
Cucurbita pepo (*see* Squash)
Cucurbita pepo (*see* Zucchini)
Cyanobacteria, cloning and inactivation of essential gene, inorganic carbon transport, *Synechocystis*, 280
Cysteine protease, soybean, degradation of trypsin inhibitors, 1086
Cytochrome *f*, heme and, gabaculine effect, etiolated wheat seedlings, 584
Cytochrome P-450
biosynthesis of dhurrin, *Sorghum bicolor*, 10
multiple forms in plants, 669
Cytokinins
changes, early flower bud differentiation, lychee, 1203
modulation of gene transcripts, micropropagated apple plantlets, 479
Cytoplasm, nuclear mutations, chlorophyll and chlorophyll-binding proteins, soybean senescence, 227
Cytosol, efficient secretion of protein, signal peptide in tobacco, vacuolar protein, 18

D

Datura innoxia, herbicide resistance, 255
Daucus carota (*see* Carrot)
Deoxyribonucleic acid, complementary
S-adenosylmethionine synthetase, cloning and nucleotide sequence, carnation, 997
Arabidopsis calmodulin isoforms deduced from, 1196
nucleotide sequence, stearoyl-acyl carrier protein desaturase, castor bean, 344
pea cytosolic copper/zinc superoxide dismutase, 1391
soybean iron superoxide dismutase, 1393
Desiccation
tolerance, glass formation, seeds, 302
tolerance in soybean, maturation proteins, 868
Dhurrin, biosynthesis, cytochrome P-450, *Sorghum bicolor*, 10
Dianthus caryophyllus (*see* Carnation)
Dicots, tobacco expressing functional oat phytochrome, 775
Dihydrodipicolinate synthase, isolation and characterization from maize, 444
Dimethyl sulfoxide, detection of hydroxyl radical, bacteria-induced hypersensitive reaction, 1157
Dunaliella salina
osmotic changes, regulation, glycerol synthesis, 50
pH regulation by Na^+/H^+ antiporter, 110

E

EDTA, Fe-catalyzed photooxidation, root growth, *Arabidopsis thaliana*, 843
EGTA, deep supercooling and pit membrane structure, xylem parenchyma of peach, 1354
Electron, transmembrane transport, beet, 1178
Elicitors, exogenous, auxin control, tobacco and soybean protoplasts, 459
Endopolyploidy, systemic, *Arabidopsis thaliana*, 985
Enzymes, chloroplast, redox-modulation, 1
Epicotyls, Azuki bean, inhibition by xyloglucan antibodies, auxin-induced elongation, 551
Erythrina caffra Thunb., seeds, tissue-type plasminogen activator in, 1150
Escherichia coli, preLHCP made in, processing of, 1220
Ethephon, treatment, polyamines and, 1053
Ethylene
biosynthesis, flower senescence-related mRNA, carnation, 1000
biosynthesis-inducing xylanase, tobacco, 571
de novo shoot regeneration, cotyledonary explants, *Brassica campestris*, 178
evolution, corn seedling root, mechanical impedance and, 1171
inhibition of auxin promotion of flower bud promotion, tobacco explants, *Agrobacterium rhizogenes* and, 1131
inhibitors, restoration of nodulation, pea mutants, 239
promotion of elongation growth, *Ranunculus sceleratus* petioles, 806
water stress-induced production, wheat, 406
wound and, transcription of *win2* genes, transgenic potato plants, 943

F

Fast atom bombardment, betaines of alfalfa, 892
Fatty acid, biosynthesis, pea root plastids, 602
Ferredoxin
FNR and, tissues of tomato, 1207
gene family, molecular cloning and differential expression, maize, 77
Ferredoxin-NADP reductase, ferredoxin and, tissues of tomato, 1207
Ferric leghemoglobin reductase, soybean root nodules, 32
Flaveria, photosynthetic and photorespiratory characteristics, 518
Flaveria cronquistii, leaf, 2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
Flavonoid, evolution, enzymic approach, 680
Flower buds
lychee, differentiation, changes in cytokinins, 1203
tobacco, ethylene inhibition of auxin promotion, *Agrobacterium rhizogenes* and, 1131
Fluorescence
chlorophyll *a*, modulation by blue light, guard cell chloroplasts, 753
quenching and zeaxanthin formation, pea chloroplasts, linear and cyclic electron transport, 635
radiant energy utilization, tobacco leaf tissue, 172
Fructose-1,6-bisphosphatase, regulation by calcium, spinach leaf, 1026
Fructosyl, transfer between 1-kestose and sucrose, wheat leaves, 251

G

Gabaculine, synthesis of hem and cytochrome *f*, etiolated wheat seedlings, 584
Galactinol synthase, mature zucchini squash leaves, 693
Galactolipids, prokaryotic, biosynthesis, spinach leaves and chloroplasts, 144
O-Galactosylhydroxyproline, gum arabic glycoprotein, twisted hairy rope, 848
Gas chromatography, mass spectrometry, immunogold labeling and, zein-bound indoleacetic acid, 1070
Gas exchange, photosynthetic, CAM cycling and, five species of Portulacaceae, 1118
Gene
cloning and inactivation, inorganic carbon transport, *Synechocystis*, 280
homology to fungal and S-RNases, *Arabidopsis thaliana*, 980
nif, circadian N_2-fixing rhythm, *Synechococcus*, 324

nitrate reductase, differential expression, *Arabidopsis thaliana*, 275
nucleotide sequence of complementary DNA clone, stearoyl-acyl carrier protein desaturase, castor bean, 344
PR-1-like protein, *Arabidopsis thaliana*, 346
rbcS and *cab* transcription, abscisic acid control, tomato leaves, 291
sucrose synthase, posttranscriptional modulation, *Sorghum bicolor*, 485
transcript modulation by cytokinins, micropropagated apple plantlets, 479
win2, ethylene and wound, transgenic potato plants, 943
Germination
light-induced, *ent*-kaurene metabolism, lettuce seeds, 837
regulatory aspects and processing, rye β-amylases, 84
Gibberellins, implication in head smut, *Sorghum bicolor*, 537
Glass
formation, desiccation tolerance, seeds, 302
transitions in soybean seed, 660
Glucan, auxin-enhanced autohydrolysis, maize coleoptile cell walls, 285
Glucanases, cell wall, auxin-induced cell elongation, maize coleoptiles, 426
β-Glucanases, gene encoding, complete nucleotide sequence of barley, 1382
β-1,3-Glucanase, messenger RNAs, response to pathogen infection, 390
(1,3)-β-Glucan synthase, developmental regulation of tomato, 664
Glucose
natural, nonstatistical carbon isotope distribution, 609
starvation, excised maize root tips, 619
Glucose 6-phosphate dehydrogenase, isoenzymes, plant fraction, soybean nodules, 862
Glutamine synthetase
immunocytochemical localization in organs, *Phaseolus vulgaris*, 507
remobilization of leaf nitrogen, natural senescence, rice leaves, 411
Glutathione
acyl carrier protein conjugated to, spinach seed, 937
ascorbate concentrations and, ambient oxygen and fixed nitrogen, soybean root nodules, 812
Glutathione *S*-transferase, enhanced activity, atrazine resistance, velvetleaf, 104
Glyceollin I, soybean-cyst nematode interactions, 1302
Glycerol, regulation of synthesis, osmotic changes, *Dunaliella salina*, 50
Glycine decarboxylase, stoichiometry of, leaf development, wheat and pea, 952
Glycine max (*see* Soybean)
Glycolate/glycerate, transporter, inner envelope membranes, spinach, 1060
Glycoproteins
cell wall, heterogeneity and cell type-specific localization, carrot, 705
efficient secretion of cytosolic protein, signal peptide in tobacco, vacuolar protein, 18
gum arabic, twisted hairy rope, 848
hydroxyproline-rich, cell walls, sporophytic maize tissues, 1214
Grafting, root isoflavonoid response, soybean plants, 1277
Grapes, characterization of heat injury, nuclear magnetic resonance methods, 957
Gravitropism, interaction with hydrotropism, maize roots, 558
Greening cycle, light-induced chloroplast differentiation, soybean cells, 962
Growth yield, maintenance and, tobacco cells, 1289
Guard cells, chloroplasts, modulation by blue light, chlorophyll *a* fluorescence, 753

H

H^+-ATPase, effect of Na_3VO_4 on P state, *Nitella translucens*, 91
Head smut, implication of gibberellins, *Sorghum bicolor*, 537
Heat, injury characterization, nuclear magnetic resonance methods, grapes, 957
Heat shock protein
cytoplasmic low molecular weight, expression during heat stress and recovery, 1038
small, corn, 1268
Heat stress, recovery and, expression of cytoplasmic low molecular weight heat shock proteins, 1038
Helianthus annuus (*see* Sunflower)
Heme, cytochrome *f* and, gabaculine effect, etiolated wheat seedlings, 584
Herbicides
acetolactate synthase, binding to regulatory site, tobacco and cotton, 310
diphenyl ether-type, protoporphyrin IX binding polypeptide, cucumber cotyledons, 432
paraquat, resistance, weed species, 314
resistance in *Datura innoxia*, 255
Histone H3, multiplicity of variants, wheat and barley, rice and maize, 453
Hordeum glaucum, paraquat resistance, 314
Hordeum vulgare (*see* Barley)
Hydraulic architecture, water relations and, *Schefflera morototoni*, 1105
Hydrogen, isotope composition, environmental influences, leaf water in bean, 588
Hydrotropism, interaction with gravitropism, maize roots, 558
Hydroxyl radical, dimethyl sulfoxide detection of, bacteria-induced hypersensitive reaction, 1157
Hypersensitivity, bacteria-induced, hydroxyl radical during, dimethyl sulfoxide detection of, 1157
Hypocotyls, sunflower, loss of basipetal IAA transport, advancing physiological age, 875

I

Indoleacetic acid
auxin transport, suspension-cultured soybean root cells, 192
carboxyl-linked, western blot analysis using cereal grain prolamins, 1076
oxidation by peroxidase, oxidized oligogalacturonides and, 1167
zein-bound, gas chromatography-selected ion monitoring mass spectrometry analysis and immunogold labeling, 1070
Indole-3-acetic acid
auxins and conjugation with aspartic acid, adventitious root formation, pea cuttings, 856
basipetal transport, advancing physiological age, etiolated *Helianthus annuus*, 875
endogenous, decline, wounding of tobacco leaves, 802
Indole-3-butyric acid, auxins and conjugation with aspartic acid, adventitious root formation, pea cuttings, 836
Invertases, acid and neutral, mesocarp, developing muskmelon fruit, 881
Iron, -catalyzed photooxidation of EDTA, root growth, *Arabidopsis thaliana*, 843
Irradiance, energy utilization, tobacco leaf tissue, 172
Isoflavonoid, root response to grafting, soybean plants, 1277

J

Jasmonic acid, induction, soybean vegetative storage protein genes, 130

K

Kaurene, metabolism, light-induced germination, lettuce seeds, 837
ent-Kaurene, biosynthesis, α-amylase production relations, germinating barley, 1099
1-Kestose, fructosyl transfer, wheat leaves, 251
α-Ketoglutarate, carrier, partial purification and reconstitution of, corn, 1003
Kunitz soybean trypsin inhibitor, degradation, cysteine preotease and, 1086

L

Lactuca sativa (*see* Lettuce)
Lampranthus spectabilis, guard cell chloroplasts, modulation by blue light, chlorophyll *a* fluorescence, 753
Landolphia kirkii, homeohydrous (recalcitrant seeds), dehydration, 1093
Leaf
alfalfa, betaines, 892
Arabidopsis thaliana leaf, 1193
calmodulin isoforms in, 1196
attached, photophosphorylation in, sunflower, 1018
barley, nitrate-dependent O_2 evolution, 898
bean, environmental influences, oxygen and hydrogen isotope, 588
beet, plasma membrane vesicles, amino acid transport in, 1338
corn, plasma membrane, Ca^{2+} pump, 565
development, stoichiometry of glycine decarboxylase during, wheat and pea, 952
maize and sorghum, regulatory phosphorylation site, phospho*enol*pyruvate carboxylase, 297
pea, mesophyll protoplasts from, respiration in, 1368
poplar, photosynthesis and cellular antioxidants, ozone, 650
rice, nitrogen remobilization, glutamine synthetase, 411
soybean, nitrate assimilation, anion availability, 398
Spartina alterniflora, hygrometric pressurization, internal gas space, 166

spinach
acetyl-coenzyme A synthetase, purification, 382
biosynthesis, prokaryotic galactolipids, 144
cytosolic fructose-1,6-bisphosphatase, regulation by calcium, 1026
nitrate reductase activity, photosynthesis, 363, 368
peroxisomes, compartmentation studies, 971
plasma membrane vesicles, symport of proton and sucrose, 615
sweet potato, sucrose-induced accumulation, β-amylase, 902
symplastic phloem loading, 349
tobacco
radiant energy utilization, 172
wounding of, decreased endogenous indole-3-acetic acid, 802
tomato, abscisic acid control, *rbcS* and *cab* transcription, 291
various plants, 2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
water potential, antitranspirant-induced increases, potato, 116
wheat, fructosyl transfer, 1-kestose and sucrose, 251
zucchini, galactinol synthase, 693
Lectin, legume seed cross-reactive material, *Spartium junceum*, 98
Leghemoglobin, noninvasive spectrophotometry, legume nodule respiration, O_2 permeability, 137
Legume
nodule respiration and O_2 permeability, noninvasive spectrophotometry, leghemoglobin, 137
seed lectin cross-reactive material, *Spartium junceum*, 98
Lemna gibba, phytochrome action in, three genes negatively regulated by, 1237
Lettuce, light-induced germination in seed, separation, light-induced *ent*-kaurene metabolism, 837
Leucoplast pyruvate kinase, subunits of, relation from *Ricinus communis*, 1253
Light
blue, modulation of chlorophyll *a* fluorescence transients, guard cell chloroplasts, 753
-induced chloroplast differentiation, soybean cells, 962
-induced germination in lettuce seeds, separation, light-induced *ent*-kaurene metabolism, 837
regulation of sink metabolism, tomato fruit, 916, 922
stresses and drought, synergistic effect, sorghum and pearl millet, 198
Light-harvesting chlorophyll *a/b* binding protein, processing, made in *Escherichia coli*, 1220
Lilium speriosum (*see* Lily)
Lily, nucleosomes, pollen mother cell protein in, 1161
Lipase, developmental regulation of callose synthase, tomato, 664
Lipid peroxidation, peribacteroid membranes, French-bean nodules, 826
Lipids, plasma membranes, oat root cells, 1136
Litchi chinensis Sonn. (*see* Lychee)
Loblolly pine, limitations of photosynthesis in, low soil temperatures, 1246
Lotus corniculatus (*see* Birdsfoot trefoil)
Lychee, early flower bud differentiation, changes in cytokinins, 1203

M

Macerase, deep supercooling and pit membrane structure, xylem parenchyma of peach, 1354
Maize (*see* Corn)
Malus domestica (*see* Apple)
Mandelonitrile lyase, immunocytochemical localization, mature black cherry seeds, 1329
Mass spectrometry, desorption chemical ionization, fast atom bombardment, betaines of alfalfa, 892
Melon, bitter, pyrophosphate dependent phosphofructokinase of, 1185
Membrane potential, sodium orthovanadate effect, P state, *Nitella translucens*, 91
Mentha piperita (*see* Peppermint)
Mentha spicata (*see* Spearmint)
Mesembryanthemum elongatum, guard cell chloroplasts, modulation by blue light, chlorophyll *a* fluorescence, 753
Mesocarp, acid and neutral invertases, developing muskmelon fruit, 881
Mesophyll protoplasts, pea leaf, light-enhanced dark respiration in, 1368
Methyl jasmonate
induction, soybean vegetative storage protein genes, 130
transpiration and, barley, 1376
3-*O*-Methyltransferase, caffeoyl-coenzyme A-specific, kinetic characterization, parsley cell suspensions, 327
Millet, pearl, synergistic effect, drought and light stresses, 198
Mitochondria
maize mutant, chloroplast structure and function, 232
NaCl-adapted tobacco cell, phosphorylative capacity, highly saline media, 69
pea and wheat, nitrogen nutrition, partitioning, 355
protein synthesis, rice seedlings, 319
Monocots, tobacco expressing functional oat phytochrome, 775
Monoraphidium braunii, immunocytochemical localization, nitrite reductase, 699
Monoterpene, content in spearmint mutant, resemblance to peppermint, 744
Monoterpene cyclase, defense mechanisms of conifers, 38, 44
Muskmelon, developing fruit, acid and neutral invertases, mesocarp, 881

N

NADH-generating system, plasma membrane vesicles loaded with, transmembrane electron transport, beet, 1178
NADH oxidase, activation, phospholipase A products, 1314
NADPH reductases, flavonoid evolution, enzymic approach, 680
Na^+/H^+ antiporter, pH regulation, *Dunaliella salina*, 110
Neomycin, inhibition of phosphatidylinositol monophosphate, phosphatidylinositol bisphosphate stimulation, plasma membrane ATPase, 340
Nicotiana tabacum (*see* Tobacco)
Nitella translucens, effect of Na_3VO_4 on P state, 91
Nitrate
-dependent O_2 evolution, intact leaves, barley, 898
regulation of assimilation by anion availability, excised soybean leaves, 398
Nitrate reductase
differential gene expression, *Arabidopsis thaliana*, 275
spinach leaf, rapid modulation, photosynthesis, 363, 368
Nitrite reductase, immunocytochemical localization, green algae, 699
Nitrogen
fixed, glutathione and ascorbate concentrations, soybean root nodules, 812
-free or energy limited environment, physiological responses, soybean, 305
induction, soybean vegetative storage protein genes, 130
nutrition, partitioning, chloroplasts and mitochondria in pea and wheat, 355
remobilization, role for glutamine synthetase, natural senescence in rice leaves, 411
Nitrogenase, argon-induced decline in activity, increases in oxygen concentration, soybean root nodules, 376
Nodulation, restoration, ethylene inhibitors, pea mutants, 239
Nodules, soybean, isoenzymes, glucose 6-phosphate dehydrogenase, 862
Northern red oak, cell membrane permeability, aluminum and temperature alteration, 644
Nuclear magnetic resonance, characterization of heat injury, grapes, 957
Nucleosomes, lily, binding form of pollen mother cell nuclear protein, 1161
Nucleotide sequence
cDNA clone, stearoyl-acyl carrier protein desaturase, castor bean, 344
cDNA encoding malic enzyme, poplar, 1385
chymotrypsin inhibitor-2 gene, barley, 1389
genomic, *Brassica napus* 20-kilodalton oleosin gene, 1395
β-glucanases, barley, 1382

O

Oat
coleoptiles, xyloglucan antibodies, auxin-induced elongation, 551
green plant tissues, conjugation, ubiquitin to proteins, 4
phytochrome, expression by tobacco, 775
root cells, lipids of plasma membranes prepared from, 1136
Oleoresin monoterpene, defense mechanisms of conifers, 38
Oleosin gene, 20-kilodalton, *Brassica napus*, genomic nucleotide sequence of, 1395
Oligogalacturonides, oxidized, oxidation of indoleacetic acid by peroxidase and, 1167
Orange, sour, high CO_2 levels, downward regulation, photosynthesis growth, 990
Organic acids, salt stress effects, roots, bacteroids, and cytosol of alfalfa, 1228
Ornithine transcarbamylase, purification and characterization, pea, 262
Oryza sativa (*see* Rice)
Osmotic shock, regulation of glycerol synthesis, *Dunaliella salina*, 50

Oxalic acid, deep supercooling and pit membrane structure, xylem parenchyma of peach, 1354
Oxygen
ambient, glutathione and ascorbate concentrations, soybean root nodules, 812
increases in concentration, argon-induced decline, nitrogenase activity in soybean root nodules, 376
isotope composition, environmental influences, leaf water in bean, 588
low concentration, stelar anoxia and, corn roots, 1294
nitrate-dependent evolution, intact leaves, barley, 898
permeability, noninvasive spectrophotometry of leghemoglobin, legume nodule respiration, 137
stress, suppression of cellulase and polygalacturonase, avocado, 269
Ozone, response of photosynthesis and cellular antioxidants, poplar leaves, 650

P

Panicum maximum, leaf, 2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
Paraquat, resistance, weed species, 314
Parenchyma, storage, cell and tissue water relations parameters, sugarcane, 794
Parsley, cell suspensions, kinetic characterization, caffeoyl-coenzyme A-specific 3-*O*-methyltransferase, 327
Pathogens, differential regulation of β-1,3-glucanase mRNAs, 390
Pea
chloroplasts, zeaxanthin formation, fluorescence quenching, 635
chloroplasts and mitochondria, nitrogen nutrition, partitioning, 355
cuttings, adventitious root formation, IAA and IBA effect on auxins, 856
cytosolic copper/zinc superoxide dismutase, complementary DNA encoding, 1391
leaf, mesophyll protoplasts from, respiration in, 1368
leaf development, stoichiometry of glycine decarboxylase during, 952
mutants, ethylene inhibitors, restoration of nodulation, 239
nuclei, Ca^{2+}-dependent protein kinase, 720
ornithine transcarbamylase, purification and characterization, 262
root plastids, fatty acid biosynthesis, 602
Peach, xylem parenchyma, deep supercooling and pit membrane structure of, 1354
Peppermint, monoterpene content, spearmint mutant, 744
Peptidyl proline, hydroxylation, growth, soybean cell culture, 656
Peribacteroid membranes, lipid peroxidation, French-bean nodules, 826
Peroxidase
anionic, seed coat, soybean, 214
overexpression, wound-induced deposition in polyphenols, transgenic plants, 577
oxidation of indoleacetic acid by, oxidized oligogalacturonides and, 1167
Peroxisomes, compartmentation studies, spinach leaf, 971
Petioles
Ranunculus, ethylene and auxin, growth, 806
sweet potato cuttings, sucrose-induced accumulation, β-amylase, 902
Petunia, leaf, 2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
Petunia hybrida, plasmamembrane of, elicitor effects, 1261
Petunia inflata, ribonuclease activity, three S-allele-associated proteins, 61
pH, regulation by Na^+/H^+ antiporter, *Dunaliella salina*, 110
Phaseolus vulgaris (*see* Bean)
Phloem, loading, 349
Phosphatidylinositol monophosphate, inhibition by neomycin, plasma membrane ATPase, carrot, 340
Phospho*enol*pyruvate carboxylase, *in vivo* regulatory phosphorylation site, maize and sorghum, 297
Phosphofructokinase, pyrophosphate dependent, colocynth, 1185
Phosphohydrolases, differentiation between types, light microsomes of corn roots, 1345
Phospholipase A, products of, plasma membrane NADH oxidase activity and, 1314
Photoperiod, control of poplar bark storage protein accumulation, 686
Photophosphorylation, attached leaves, sunflower at low water potentials, 1018
Photosynthesis
acclimation, root restriction, cotton seedling, 627
cellular antioxidants, response to ozone, poplar leaves, 650
circadian rhythms, red kidney bean, 831
differential inhibition, low growth temperature, spring and winter wheat, 491
electron transport chain, damage induced by 5-aminolevulinic acid, cucumber cotyledons, 761
high levels of CO_2, downward regulation, sour orange, 940
limitations, low soil temperatures, Loblolly pine, 1246
nitrogen nutrition and partitioning, chloroplasts and mitochondria, pea and wheat, 355
photon flux density cycles, carbon gain, chrysanthemum, 529
photorespiratory characteristics and, *Flaveria* species, 518
quantum yield, long-term CO_2 elevation, *Scirpus olney*, 221
rapid modulation, spinach leaf nitrate reductase activity, 363, 368
Photosystem II
plastoquinone pool, dark ammonium assimilation, *Selenastrum minutum*, 513
proteins, colocalization of polyphenol oxidase, broad bean, 26
radiant energy utilization, tobacco leaf tissue, 172
Phytochrome
action, *Lemma* genes negatively regulated by, 1237
functional oat, expression by tobacco, 775
production, cabbage, 1079
Phytotropin, biochemical bases for loss of basipetal IAA transport, advancing physiological age, etiolated sunflower hypocotyls, 875
Pine, defense mechanisms of conifers, 38, 44
Pinus taeda (*see* Loblolly pine)
Pisum sativum (*see* Pea)
Plasmalemma, redox activity, Fe-deficiency cucumber roots, 1034
Plasma membrane
corn leaf, Ca^{2+} pump, 565
Na^+/Ca^{2+} interactions, maize roots, 331
Petunia hybrida, elicitor effects, 1261
vesicles, symport of proton and sucrose, spinach leaves, 615
Plasminogen activator, tissue-type, inhibitor of, seeds of *Erythrina caffra* Thunb., 1150
Plastids, pea root, fatty acid biosynthesis, 602
Plastoquinone pool, photosystem II, dark ammonium assimilation, *Selenastrum minutum*, 513
Pollen mother cell nuclear protein, binding form of, nucleosomes, lily, 1161
Polyamines
cell cycle, *Catharanthus roseus* cells, 1008
host-viroid interactions, 1053
Polyclonal antibodies, inhibition of auxin-induced cell elongation, maize coleoptiles, cell wall glucanases, 426
Polycytidylic acid, ribonuclease activity, three S-allele-associated proteins, *Petunia inflata*, 61
Polygalacturonase
cellulase and, alcohol dehydrogenase isoenzymes, avocado, 269
novel technique for measuring tissue firmness, tomato fruit, 545
Polyphenol oxidase, colocalization, photosystem II proteins, broad bean, 26
Polyphenols, wound-induced deposition, transgenic plants, peroxidase overexpression, 577
Polyribosomes, maize root tip, protein synthesis, elongation and termination reactions, 418
Polysaccharides, gum arabic glycoprotein, twisted hairy rope, 848
Poplar
bark storage protein accumulation, photoperiod control, 686
cDNA encoding malic enzyme, nucleotide sequence of, 1385
leaf, photosynthesis and cellular antioxidants, ozone, 650
Populus deltoides (*see* Poplar)
Portulacaceae, CAM cycling, photosynthetic gas exchange correlation, 1118
Potassium bicarbonate, short-term effects of carbon dioxide, carnation callus cell respiration, 467
Potato
anti-transpirant-induced increases, leaf water potential, 116
growth enhancement and development, nonfluorescent *Pseudomonas* sp., 928
transgenic plants, systemic transcription of *win2* genes, ethylene and wound, 943
Prolamins, cereal grain, western blot analysis, 1076
Proline
deposition, low water potentials, corn root, 1125
elevated accumulation, NaCl-adapted tobacco cells, 245
Protein
conjugation of ubiquitin, green plant tissues, oat, 4
maturation, desiccation tolerance, soybean, 868

normal cellular mRNA levels, during heat shock, barley, 1048
synthesis, elongation and termination reactions, maize root tip polyribosomes, 418
synthesis in mitochondria, rice seedlings, 319
Protein kinase
Ca^{2+}-dependent, pea nuclei, 720
distribution in amyloplasts, cultured cells of sycamore, 1142
Proton, sucrose and, plasma membrane vesicles, spinach leaves, 615
Proton pump, vanadate-sensitive, temperature effects, maize root microsomes, 1114
Protoplasm, spontaneous generation of subprotoplasts, disintegrated *Bryopsis* cell, 819
Protoplasts
tobacco, wall deficiency, transformation by *Agrobacterium tumefaciens*, 498
tobacco and soybean, auxin control, defense reactions and responsiveness to exogenous elicitors, 459
Protoporphyrin IX
binding polypeptide, cucumber cotyledons, diphenyl ether-type herbicides, 432
conversion by enzymes of δ-aminolevulinic acid, cucumber cotyledons, 910
PR proteins, isolation and characterization of gene, *Arabidopsis thaliana*, 346
Prunus serotina (*see* Black cherry)
Pseudomonas sp., nonfluorescent, growth and development of the potato, 928

Q

Quercus rubra (*see* Northern red oak)

R

Raffinose, symplastic phloem loading, 349
Ranunculus sceleratus, radial growth in petioles, auxin, ethylene promotion of elongation, 806
Respiration, light-enhanced dark, mesophyll protoplasts of pea leaf, 1368
Rhizospheres, nonambient pO_2, adaptation of nodulated soybean to growth, 728
Ribonuclease, activity of three S-allele-associated proteins, *Petunia inflata*, 61
Ribonucleic acid, messenger
ferredoxin gene family, molecular cloning and differential expression, maize, 77
flower senescence-related, ethylene biosynthesis, carnation, 1000
gene transcript modulation by cytokinins, micropropagated apple plantlets, 479
β-1,3-glucanase messenger, response to pathogen infection, 390
normal cellular protein levels, during heat shock, barley, 1048
Ribulosebisphosphate carboxylase/oxygenase, large subunit, protection of tryptic-sensitive sites, spinach, 335
Rice
leaf, nitrogen remobilization, glutamine synthetase, 411
multiplicity of histone H3 variants, 453
seedling, protein synthesis, mitochondria, 319
Ricinus communis (*see* Castor bean)
Ripening, flower senescence-related mRNA, ethylene biosynthesis, carnation, 1000
RNases, fungal and S-gene, *Arabidopsis thaliana*, 980
Root
Arabidopsis thaliana, Fe-catalyzed photooxidation, EDTA, 843
corn
glucose starvation, 619
growth at low water potentials, 1125
hydrotropism, interaction with gravitropism, 558
phosphohydrolase differentiation in, 1345
protein synthesis, polyribosomes, 418
restriction, factor in photosynthetic acclimation, 627
sodium influx, lack of competition with calcium, 331
spatial distribution, low water potentials, 438
stelar anoxia in low oxygen concentrations, 1294
vanadate-sensitive proton pump from, temperature effects, 1114
corn seedling, ethylene evolution, mechanical impedance and, 1171
cucumber, plasmalemma redox activity and hydrogen in, 1034
isoflavonoid response to grafting, soybean plants, 1277
nodules of soybean, ferric leghemoglobin reductase, 32
oat, lipids of plasma membranes prepared from, 1136
pea
exogenous indole-3-acetic acid and indole-3-butyric acid, adventitious root formation, 856
plastids, fatty acid biosynthesis, 602
soybean
ambient oxygen and fixed nitrogen, glutathione and ascorbate concentrations, 812
auxin transport, suspension-cultured cells, 184, 192
oxygen concentration, argon-induced decline in nitrogenase activity, 376
tomato, ATPase activity, salinity, 153
Rye, β-amylases, regulatory aspects and processing, 84

S

Saccharum (*see* Sugarcane)
Saline, phosphorylative capacity, mitochondria, NaCl-adapted tobacco cells, 69
Salinity, cytochemical localization of ATPase activity, tomato roots, 153
Salt, -adapted tobacco cells, elevated accumulation, proline, 245
Salt stress, effects on amino acid, organic acid, and carbohydrates, roots, bacteroids, and cytosol of alfalfa, 1228
Sap, xylem, proteins, apple, 597
Scenedesmus obliquus, immunocytochemical localization, nitrite reductase, 699
Schefflera morototoni, water relations, hydraulic architecture and, 1105
Scirpus olney, long-term CO_2 elevation, quantum yield of photosynthesis, 221
Secale cereale (*see* Rye)
Seed
bean, resistance to cowpea weevil, α-amylase inhibitor, 993
black cherry, mandelonitrile lyase in, 1329
Erythrina caffra Thunb., inhibitor of tissue-type plasminogen activator, 1150
glass formation and desiccation tolerance, 302
homeohydrous (recalcitrant), *Landolphia kirkii*, 1093
lectin cross-reactive material, *Spartium junceum*, 98
lettuce, light-induced germination, *ent*-kaurene, 837
soybean
glass transitions, 660
growth rate and sucrose level, endogenous abscisic acid effects, 1308
purification, anionic peroxidase, 214
spinach, acyl carrier protein conjugated to glutathione, 937
Seedling
corn
ethylene evolution from root, mechanical impedance and, 1171
root restriction, factor in photosynthetic acclimation, 627
rice, protein synthesis, mitochondria, 319
sunflower, ACC transport in, 1360
wheat, synthesis of heme and cytochrome *f*, gabaculine, 584
Selenastrum minutum, dark ammonium assimilation, reduction, plastoquinone pool of photosystem II, 513
Senescence
flower, mRNA and ethylene biosynthesis, carnation, 1000
soybean, chlorophyll and chlorophyll-binding proteins, cytoplasmic and nuclear mutations, 227
S-gene, RNAse, genes with homology, *Arabidopsis thaliana*, 980
Shoot, *de novo* regeneration, cotyledonary explants of *Brassica campestris*, ethylene, 178
Silver ions, treatment, polyamines and, 1053
Sink, metabolism, light regulation, tomato fruit, 916, 922
Sodium, lack of competition with calcium, regulation of sodium influx, salinized maize roots, 331
Sodium chloride
-adapted tobacco cell, mitochondria, phosphorylative capacity, 69
tobacco cells adapted to, growth yields and maintenance coefficients, 1289
Sodium orthovanadate, P state of *Nitella translucens*, 91
Solanum tuberosum (*see* Potato)
Sorghum
in vivo regulatory phosphorylation site, C_4-leaf phospho*enol*pyruvate carboxylase, 297
posttranscriptional modulation, sucrose synthase genes, tissue-specific expression, 485
synergistic effect, drought and light stresses, 198
Sorghum bicolor
implication of gibberellins in head smut, 537
involvement of cytochrome P-450, biosynthesis of dhurrin, 10
Soybean
cell culture, peptidyl proline hydroxylation, growth, 656
cyst nematode interactions, glyceollin I in, 1302
desiccation tolerance, maturation proteins, 868
growth in nitrogen-free or energy limited

environment, physiological responses, 305
iron superoxide dismutase, complementary DNA from, 1393
Kunitz and Bowman-Birk trypsin inhibitors, degradation by cysteine protease, 1086
leaf, nitrate assimilation, anion availability, 398
light-induced chloroplast differentiation, 962
nodulated, adaptation to growth in rhizospheres, nonambient pO_2, 728
nodules, isoenzymes, glucose 6-phosphate dehydrogenase, 862
protoplasts, auxin control, defense reactions and responsiveness to exogenous elicitors, 459
root, auxin transport, suspension-cultured cells, 184, 192
root nodules
ambient oxygen and fixed nitrogen, glutathione and ascorbate concentrations, 812
ferric leghemoglobin reductase, 32
oxygen concentration, argon-induced decline in nitrogenase activity, 376
seed
glass transitions, 660
growth rate and sucrose level, endogenous abscisic acid effects, 1308
seed coat, anionic peroxidase, 214
senescence, chlorophyll and chlorophyll-binding proteins, cytoplasmic and nuclear mutations, 227
vegetative storage protein genes, induction, nitrogen and methyl jasmonate, 130
wild-type and nodulation-mutant plants, grafting, root isoflavonoid response to, 1277
Spartina alterniflora, hygrometric pressurization, internal gas space, 166
Spartium junceum, legume seed lectin cross-reactive material, 98
Spearmint, mutant, resemblance to peppermint, monoterpene content, 744
Spectrophotometry, leghemoglobin, oxygen permeability, legume nodule respiration, 137
Spinach
glycolate/glycerate transporter, chloroplast inner envelope membranes, 1060
leaf
acetyl-coenzyme A synthetase, purification, 382
2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
cytosolic fructose-1,6-bisphosphatase, regulation by calcium, 1026
peroxisomes, compartmentation studies, 971
plasma membrane vesicles, symport of proton and sucrose, 615
leaf nitrate reductase activity, rapid modulation, photosynthesis, 363, 368
leaves and isolated chloroplasts, biosynthesis, prokaryotic galactolipids, 144
protection of tryptic-sensitive sites, large subunit, ribulosebisphosphate carboxylase/oxygenase, 335
seed, acyl carrier protein conjugated to glutathione, 937
Spinacia oleracea (*see* Spinach)
Sporamin, sucrose-induced accumulation of β-amylase, leaf-petiole cuttings, sweet potato, 902
Sporisorium reilianum (*see* Head smut)
Sporophytic tissues, corn, hydroxyproline-rich glycoproteins in cell walls, 1214
S-proteins, ribonuclease activity, *Petunia inflata*, 61
Squash, ascorbic acid oxidase, 159
Starch, sucrose-induced accumulation of β-amylase, leaf-petiole cuttings, sweet potato, 902
Stelar anoxia, low oxygen concentration and, corn roots, 1294
Stem, hygrometric pressurization of internal gas space, *Spartina alterniflora*, 166
Stomata, circadian rhythms in photosynthesis, red kidney bean, 831
Storage, parenchyma, cell and tissue water relations parameters, sugarcane, 794
Storage protein, poplar bark, accumulation, photoperiod control, 686
Subprotoplasts, spontaneous generation, disintegrated *Bryopsis* cell, 819
Sucrose
fructosyl transfer, wheat leaves, 251
-induced accumulation of β-amylase, leaf-petiole cuttings, sweet potato, 902
proton and, plasma membrane vesicles, spinach leaves, 615
Sucrose phosphate, transport, vacuoles or tonoplast vesicles of red beet, 1014
Sucrose phosphate synthase, sucrose biosynthesis in plants, 473
Sucrose synthase, expression, cold acclimation, wheat, 887
Sugar
sink metabolism, light regulation, tomato fruit, 916
symplastic phloem loading, 349
Sugarcane, cell and tissue water relations parameters, storage parenchyma, 794
Sulfonylurea, herbicide resistance in *Datura innoxia*, 255
Sunflower
biochemical bases for loss of basipetal IAA transport, advancing physiological age, hypocotyls, 875
leaf, 2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
low water potentials, photophosphorylation in attached leaves, 1018
seedling, ACC transport in, 1360
Superoxide dismutase
cytosolic copper/zinc, pea, complementary DNA encoding, 1391
iron, soybean, complementary DNA encoding, 1393
Sweet potato, leaf-petiole cuttings, sucrose-induced accumulation, β-amylase, 902
Synechococcus, circadian N_2-fixing rhythm, 324
Synechocystis, cloning and inactivation of essential gene, inorganic carbon transport, 280

T

Talinum (*see* Portulacaceae)
Taproot, alfalfa, carbohydrate metabolism, winter adaptation and spring regrowth, 786
Temperature
alteration and aluminum, cell membrane permeability, Northern red oak, 644
low growth, differential inhibition of photosynthesis, spring and winter wheat, 491
soil, photosynthesis and, Loblolly pine, 1246
vanadate-sensitive proton pump and, maize root microsomes, 1114
Thuja occidentalis, water relations, hydraulic architecture and, 1105
Thylakoid membranes, *Chlamydomonas reinhardtii*, 1321
Ti-plasmid, modulation of *Agrobacterium-Vitis* interaction, 121
Tobacco
acetolactate synthase inhibiting herbicides, binding to regulatory site, 310
differential regulation, β-1,3-glucanase mRNAs, pathogen infection, 390
ethylene biosynthesis-inducing xylanase, 571
flower buds, ethylene inhibition of auxin promotion, *Agrobacterium rhizogenes* and, 1131
functional oat phytochrome, 775
leaf, radiant energy utilization, 172
NaCl-adapted, elevated accumulation, proline, 245
phosphorylative capacity in highly saline media, mitochondria, NaCl adaptation, 69
protoplasts
auxin control, defense reactions and responsiveness to exogenous elicitors, 459
wall deficiency, transformation by *Agrobacterium tumefaciens*, 498
signal peptide of vacuolar protein, efficient secretion, cytosolic protein, 18
sodium-chloride-adapted cells, growth yields and maintenance coefficients, 1289
wounding of leaves, decline, endogenous indole-3-acetic acid, 802
Tomato
developmental regulation, (1,3)-β-glucan synthase, 664
fruit, light regulation, sink metabolism, 916, 922
genotypes, CO_2-enhanced yield, foliar deformation, 713
leaf
abscisic acid control, *rbcS* and *cab* transcription, 291
2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
novel technique for measuring tissue firmness, 545
photosynthetic and nonphotosynthetic tissues, ferredoxin and FNR from, 1207
root, ATPase activity, salinity, 153
Trichomes, secreting glandular, 675
Triticum aestivum (*see* Wheat)
Tryptic proteolysis, -sensitive sites, large subunit of RUBISCO, spinach, 335

U

Ubiquitin, conjugation to proteins, green plant tissues, oat, 4

V

Vacuolar protein, signal peptide in tobacco, efficient secretion, cytosolic protein, 18
Vanadate

effects on membrane electrical parameters, *Nitella translucens*, 91
proton pump sensitive to, temperature effects, maize root, 1114
Velvetleaf, atrazine resistance, enhanced glutathione *S*-transferase activity, 104
Vicia faba (*see* Broad bean)
Vitis, *Agrobacterium* interaction, modulation of, 121

W

Water
potentials
leaf, antitranspirant-induced increases, potato, 116
low, growth of corn root, 1125
low, spatial distribution, turgor and root growth, 438
relations
hydraulic architecture and, *Schefflera morototoni*, 1105
storage parenchyma, sugarcane, 794
Water stress
-induced ethylene production, wheat, 406
light stresses and, synergistic effect, sorghum and pearl millet, 198
Weeds, paraquat resistance, 314
Weevil, cowpea, resistance of bean seed, α-amylase inhibitor, 993
Wheat
cold acclimation, sucrose synthase expression, 887
etiolated seedlings, synthesis of heme and cytochrome *f*, gabaculine, 584
inhibitors of heterologous α-amylases, 768
leaf
2-carboxyarabinitol 1-phosphate measurement, isotope dilution, 208
fructosyl transfer, 1-kestose and sucrose, 251
leaf development, stoichiometry of glycine decarboxylase during, 952
multiplicity of histone H3 variants, 453
spring and winter, differential inhibition of photosynthesis, low growth temperature, 491
water stress-induced ethylene production, 406
Wound
ethylene and, transcription of *win2* genes, transgenic potato plants, 943
-induced deposition of polyphenols, transgenic plants, peroxidase overexpression, 577
-induced monoterpene biosynthesis, defense mechanisms, conifers, 44

X

Xylanase, ethylene biosynthesis-inducing, tobacco, 571
Xylem, sap proteins in apple, 597
Xylem parenchyma, peach, deep supercooling and pit membrane structure of, 1354
Xyloglucan, antibodies, inhibition of auxin-induced elongation, Azuki bean epicotyls, 551

Z

Zea mays (*see* Corn)
Zeaxanthin, formation and energy-dependent fluorescence quenching, pea chloroplasts, linear and cyclic electron transport, 635
Zucchini, mature leaves, galactinol synthase, 693
